

A WORLD OF DIFFERENCE

A WINDOW & DOOR COMPANY LIKE NO OTHER.

COVER: Douglas Knight Construction

Welcome to windows and doors that never compromise, made by people who don't either. From our Seed-to-Window approach to cutting edge glazing technology for greater thermal efficiency, our meticulous, earth-friendly construction and forward-thinking design make every product one-of-a-kind.

600 dealers, distributors and company stores throughout the country and four manufacturing plants strategically located in California and Wisconsin ensure our world-class windows and doors will be delivered to you where and when you need them.

The following pages are the start of what we can offer your next project. And if you choose our windows and doors, we're confident it will also be the start of a lasting relationship.

EARTH-FRIENDLY. MORE THAN AN APPROACH, AN OBLIGATION

Sierra Pacific Windows is part of Sierra Pacific Industries, which sustainably manages over 2 million acres of timberland in California, Oregon and Washington State. We're the largest millwork producer and one of the largest lumber companies in the U.S.

Our size creates a big obligation to protect our environment.

At Sierra Pacific, we believe healthy trees, good water quality and enduring wildlife habitat are the natural result of sound forest management. That's why we adhere to the environmental protection standards of the Sustainable Forestry Initiative® (SFI) and why all our pine and Douglas fir windows and doors are labeled SFI certified.

We bring in our own Professional Foresters and Wildlife Biologists to help protect wildlife habitat, watercourses and plant life, and to help manage our lands based on "sustained yield" practices. As a result, Sierra Pacific Industries plants at least 10 million new trees every year and will nearly triple the amount of wood growing on its lands in the next 100 years, with average tree diameters nearly doubling in that time.

To learn more about how Sierra Pacific Industries protects, preserves and invests in its own forest lands, visit spi-ind.com.

OUR UNIQUE APPROACH TO BUILDING WORLD-CLASS WOOD WINDOWS AND DOORS.

As a proud part of this family-owned, environmentally-committed company, Sierra Pacific is the only window company that manufactures its products with complete vertical integration. The full cycle makes use of everything, from the premium wood stock that goes into our wood windows and doors down to wood shavings that become animal bedding and chips that are used as part of our cogeneration power process. It also allows continuous quality control from the moment our tree seeds are planted until our beautiful wood windows are produced, approved and delivered to you.

FIVE BEAUTIFUL CHOICES, ONE EXACTING STANDARD.

Sierra Pacific windows and doors are crafted in five unique manufacturing styles. Each delivers its own design and performance advantages. In other words, there are no bad choices, only good ones.

ALUMINUM CLAD WOOD

The best of both worlds, combining beautiful wood inside with low maintenance aluminum cladding outside. Wood is select pine, or upgrade to one of seven other species, all protected by CoreGuard Plus® wood preservative. Double thick cladding is finished with a powder coating process that leads the industry in durability and environmental safety.

ALL-WOOD

For a classic, distinctive look, our all-wood windows and patio doors offer timeless elegance with exceptional thermal performance. As with all our wood products, long-term durability is ensured by CoreGuard Plus®, a leading wood treatment against rot and insects.

H3®

Inventive Fusion Technology™ integrates three components (extruded aluminum, vinyl and wood) into one perfect window with greater energy efficiency and performance. Double thick aluminum exteriors are protected by our industry-leading powder coated finishes, while the wood interior is preserved with CoreGuard Plus®.

FEELSAFE™

Our hurricane-resistant windows and patio doors feature high-strength, laminated glass, plus highly reinforced engineering and construction. They're built to withstand heavy storm impact as well as determined burglars.

VINYL

All the benefits of vinyl windows and patio doors with Sierra Pacific DNA, our vinyl new construction and replacement products offer many of the same features and design options as our premium wood products. Choose from a complete lineup of operating styles, sizes and shapes.

BEAUTIFUL INSIDE, LOW MAINTENANCE OUTSIDE.

Sierra Pacific clad windows and doors feature exteriors with industry-leading, extruded aluminum cladding that's twice as thick as roll-form cladding. All come with rich, wood interiors in a wide selection of species and finishes.

Choose from multiple leading-edge glazing options.

Also available with FeelSafe impact rated glazing.

Protected to the very core by our CoreGuard Plus™ wood treatment.

Exterior is fully encased in weatherproof, low maintenance, aluminum cladding.

Unlimited color choices in powder coat for extreme durability.

Designer hardware in many luxurious finishes.

Our heavy duty extruded aluminum cladding is at least twice as thick as roll-form cladding.

Optional stained or painted interior factory finish on select products.

Windows and doors crafted from pine and Douglas fir are third-party certified to meet the SFI fiber sourcing requirements.

Wood interior for natural beauty & insulation.

Available with simulated divided lites or a variety of decorative grilles.

Choose from beautiful, select species of interior wood.

Large variety of interior trim profiles.

AWARD-WINNING FOR A REASON.

Constructed with our patented Fusion Technology™, H3 integrates extruded aluminum, vinyl and wood into one beautiful window with celebrated thermal performance, enhanced aesthetics, an extreme seal and easier installation.

H3 engineering advancements also include the H3 accessory exterior trim option and a continuous head and sill for water-tight mull joints when putting units together.

Wood interior for warmth and beauty. Available natural, primed or factory finished, in eight different wood species.

Innovative snap-lock design requires no unsightly screws or fasteners on the interior.

H3 CASEMENT

Windows and doors crafted from pine and Douglas fir are third-party certified to meet the SFI fiber sourcing requirements.

Protected to the very core by our CoreGuard Plus™ wood treatment.

Low profile surface mounted lock with easy to operate lever.

Top of the line Encore handle and operating hardware are standard.

Available for new construction or replacement applications.

H3 AWNING

H3 HORIZONTAL SLIDER

H3 SINGLE & DOUBLE HUNG

Easy-tilt sash for easy cleaning.

Many simulated divided lite grille profiles to choose from.

An integral rigid nailing fin provides greater structural integrity, an improved water barrier and near elimination of racking problems.

Heavy duty extruded aluminum clad frame and sash.

Constant force balance for smooth, easy operation.

Revolutionary H3 accessory exterior trim option integrates with nail fin for easy install of four different profiles with no additional nailing.

Seamless Integral continuous head and sill factory mull system stops water.

H3 DIRECT GLAZE

AUTHENTIC, REMARKABLE AND ENERGY-EFFICIENT.

Sierra Pacific all-wood windows and doors offer elegant and luxurious wood exteriors for those who value the extraordinary appearance and performance of natural wood. Choose a wood species and finish option to make a genuine impression.

Choose from select species of wood.

Exteriors are available primed or natural.

Protected to the very core by our rainforest-proven CoreGuard Plus™ wood treatment.

Custom made, by hand, to your exact specifications.

Choose from multiple leading-edge glazing options.

Wood interior provides natural beauty & insulation.

Dual panes, plus decorative glass options.

Windows and doors crafted from pine and Douglas fir are third-party certified to meet the SFI fiber sourcing requirements.

Optional stained or painted interior factory finish using advanced materials & equipment on select products.

INSPIRED BY NATURE. DESIGNED TO LAST.

The exteriors of our clad windows and doors are fully encased in low maintenance, heavy-duty, extruded aluminum that's at least twice as thick as roll-form cladding.

What's more, our finishing process leads the industry in durability and environmental safety. Non-hazardous AAMA 2604 and 2605 powder-coatings have the color retention, surface hardness and scratch resistance necessary to withstand even the harshest conditions.

As for colors? Nobody gives you more choices than Sierra Pacific. 70 colors and some sensational textures allow you to add warmth, a splash of cheerfulness or a new statement to your designs. We'll also custom match any color you choose.

See your local representative for actual cladding samples. Printing limits our ability to show colors precisely.

RICH, LUXURIOUS, THE NATURAL BEAUTY OF WOOD.

The hand-crafted appeal of real wood gives window interiors and trim a finishing touch that adds warmth and authenticity to any room. Yet every room is different, so we offer eight beautiful species of wood to match or complement any design consideration.

Don't see the perfect wood here? No worries. As long as it's workable, we'll make your interiors out of almost any wood in the world.

See your local representative for actual wood samples. Wood is a natural material with character, color and grain patterns with varying densities. Wood veneer wrap may be used on select components of various species.

EXTERIOR TRIM PROFILES.

A MODERN APPROACH TO A TIMELESS LOOK.

To add your personal touch, our simulated divided lite profiles give you a number of starting points, while our grille configurations are limited only by your imagination. Start with our standard geometries and dream from there.

SIMULATED DIVIDED LITE

The classic look of traditional true divided lite without the energy loss of individual glass panes, our simulated divided lite grilles offer tough extruded aluminum outside with beautiful natural wood inside. Complete the look with optional spacers between the glass. Profiles are also available in all-wood.

GRILLES BETWEEN THE GLASS

Grilles stay out of the way while you still get the look you want.

GRILLE CONFIGURATIONS

Your grilles can be as traditional or as unique as you choose. Our standard configurations include equal lite and Prairie. But with our custom configurations, we're ready to transform your inspiration into reality.

FLEXSCREEN

Hidden and beautifully simple, FlexScreen is the first screen of its kind made of flexible spring steel to fit firmly into screen tracks. No screen frames, no hardware, just refreshingly easy installation.

OTHER SCREEN OPTIONS

Choose from our standard aluminum framed screen that matches your hardware or your exterior clad color, with optional wood wrap available for casements and awnings. Even choose your screen mesh, from standard fiberglass to the improved visibility and even smaller insect barrier of BetterVue® or UltraVue™

GENIUS CUSTOMIZABLE RETRACTABLE SCREENS

Available as an interior screen on select products.

There when you need them, and disappear when you don't. These screens provide quiet, smooth operation, and give protection against airborne pests.

ADVANCED FACTORY FINISH.

It's tough to beat a factory finish applied with state-of-the-art equipment in a carefully controlled, ultra-clean environment. Choose from two premium options: Ultra Stain and Ultra Coat.

Ultra Stain is an advanced, multi-step process that brings out all the beauty of your wood interior. Ultra Coat is a white or black durable interior paint.

Black

Factory finishes available on select products. Ask your sales representative for details.

Ultra Coat and Ultra Stain finishes are a meticulous and advanced process to ensure maximum beauty of your wood window and door interiors. Yet, wood is a natural material with character, color, and grain patterns with varying densities, even in lumber taken from the same tree. Colors and stain absorption will vary widely based on the wood's natural character; therefore results are not guaranteed by Sierra Pacific Windows for color or grain consistency. While not always necessary, touch up in the field of the finish should be expected.

Chad Holder for This Old House

GLAZING TECHNOLOGY FINE-TUNED FOR YOU.

The right glass will make your home more comfortable and potentially improve your energy efficiency. It can capture the sun's heat, or reflect it. You can also reduce outside noise, block more of the sun's damaging UV rays, even enhance your privacy.

We offer some of the most advanced glazing options in the industry. With your builder, we'll help you select the glass that suits you and your environment.

Waechter Architecture

THE ADVANTAGE OF NO-METAL SPACERS.

One of the technological advances that makes our glazing perform so well are patented No-Metal TrueWarm® Edge spacers.

Many window manufacturers use aluminum spacers between their panes of glass. These conduct cold and heat, and that's not good for thermal performance.

Our no-metal warm edge spacers are 100% polymer structural foam, for excellent thermal performance and a superior seal.

No-Metal TrueWarm® Edge Spacer.

Low-E 366

Cardinal's triple layer silver product for superior performance. 95% UV protection. Solar heat gain coefficient of 0.27*. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting Endur Spacer.

Low-E 366 with i89 Coating**

The same superior performance as regular Low-E 366 (above), but with the addition of i89 coating on the interior surface to increase insulating value and reduce solar heat gain. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting Endur Spacer.

Low-E 340

Cardinal's newest glazing innovation. It has an amazingly low 0.18* solar heat gain coefficient to keep out the heat even in the blazing sun. Slightly tinted. Blocks 98% of UV rays. Less heat gain when it's hot, less heat loss when it's cold, and the best glare control under the sun. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting Endur Spacer.

Low-E 180 Passive Solar

A very high (0.70*) solar heat gain coefficient. Ideal for reducing your heating bills in colder climates. Superior insulation value blocks cold and keeps in the heat. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting Endur Spacer.

Low-E 180 Passive Solar with i89 Coating**

The same superior performance as regular Low-E 180 (above), but with the addition of i89 coating on the interior surface to increase insulating value. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting Endur Spacer.

Dual or Triple Pane Low-E

Insulated for improved energy efficiency. Single surface Low-E coating to reduce solar heat gain and block UV rays.

Insulated Glass

For moderate climates. Basic glazing with basic performance.

Sound Control

Reduces outside noise by as much as 50% while blocking 99% of damaging UV rays. Laminated for shatter resistance. Available insulated or non-insulated.

FeelSafe® Insulated Low-E with or without Sea Turtle Glazing

Protect your home and our sea turtle population. FeelSafe windows and patio doors are engineered inside and out to resist hurricane-force winds, pounding rain, wind-borne debris, and rapid pressure changes that could implode your home or literally blow off the roof. Available in Low-E, Low-E 366 or Low-E 340.

FeelSafe® Laminated with or without Sea Turtle Glazing

For moderate climates, our non-insulated, shatter-resistant FeelSafe glass provides the utmost security—whether your concern is severe storms or intruders. Also available in Low-E 366 or Low-E 340.

*All values shown are center of glass. ** Interior surface coatings, also known as surface #4, are applied to the interior (room-side surface) of a dual pane IG unit, resulting in improved thermal performance and lower heating costs. Because the coating reflects heat back into the room, the room-side pane of glass will be slightly colder in winter, causing a higher potential for interior condensation.

THE ADVANTAGES OF COREGUARD PLUS™

Sierra Pacific wood windows and doors are protected by CoreGuard Plus™ wood treatment, a patented process that, when needed, penetrates wood right to the core to repel water, so our windows and patio doors have superior dimensional stability making them less likely to warp or swell.

In addition, CoreGuard Plus contains fungicides and insecticides to deeply protect all wood species from pests and rotting. Amazingly, this strong protection comes from a naturally organic, water-based treatment with nearly zero VOC's, which helps us maintain our strict environmental stewardship.

To ensure CoreGuard Plus effectiveness, sections of our windows undergo harsh testing in a Hawaiian rainforest that mimics decades of typical residential exposure. No wonder we have one of the strongest wood rot warranties in the industry.

Thoroughly tested in Hawaiian rain forests against water, insects and rot.

Taylor Proctor & AJ Canaria | Prentiss + Balance + Wickline Architects

COREGUARD PLUS™

DESIGNED TO FIT EVERY VISION.

Sierra Pacific windows and doors come in a wide selection of operating styles. And the choices don't end there.

You also get to select wood type, hardware style and finish, cladding color and texture, glazing preference, grilles, screens and even more finishing touches. No matter what you choose, you get the superior performance only Sierra Pacific can deliver.

HIDDEN HARDWARE, AN ASPEN SIGNATURE

The locking hardware, normally visible on the side jambs, is elegantly hidden from sight. Even the window handles are low-profile, folding into a nesting cover to stay clear of window treatments and interfere less with window lines. It comes in a variety of beautiful finishes to complement your windows, giving Aspen a refined look through and through.

BEAUTIFUL FINISHES

DESIGN WITH AN INDUSTRIAL ACCENT.

One of the narrowest sightlines in the industry along with exposed contemporary locking hardware give our Urban casement windows a modern industrial aesthetic that creates a beautiful, on-trend architectural accent.

Available in all-wood or clad exteriors, use them alone or in combination with other window types and shapes.

CONTEMPORARY HARDWARE (standard)

TRENDY, INDUSTRIAL

OPEN A WORLD OF POSSIBILITIES.

Top-to-bottom unobstructed views, clean lines and wide-open ventilation make our Sierra Pacific casement windows a favorite across the country. Smooth operation is ensured by our Encore handle. It folds out when you need it, then folds back to stay out of the way of window treatments. These windows also swing open a full 90 degrees for easy cleaning.

Choose the charm of our all-wood exteriors or the low-maintenance convenience of our aluminum cladding, and combine them with other fixed or operable Sierra Pacific windows to create the perfect look.

ENCORE HANDLE

Available in 11 decorator finishes, it folds out for easy use, then folds back out of the way.

TOP IT OFF

For added charm or to complete a look, add a radius top or consider side by side casements.

A TIMELESS VIEW.

For sheer simplicity of operation and a little European flare, you will love the way our standard pushout casement accents any interior with classic appeal.

With a simple turn of its lever and a gentle push, these character-rich windows swing wide open, then stay in place thanks to carefully engineered stainless steel friction hinges.

Shown with wooden swing screen.

TAILORED FOR YOU

Whether you want rich, wood exteriors in your choice of beautiful species of wood or our thick aluminum cladding in your choice of colors and textures, our standard pushout casements will add accent to your design.

HARDWARE FINISHES

TWO BEAUTIFUL SCREEN OPTIONS

Choose from two equally impressive screen choices – a historical hinged version or our Genius® retractable screen.

Shown with Genius® retractable screen.

SPECIAL HINGES STAY PUT

Engineered friction hinges with a turnstile locking mechanism alleviate the age-old problem of pushout windows that “drift” shut in a strong wind. These improved stainless steel hinges stay where you set them.

MULLING AND STACKING ADVANTAGE

The continuous head and sill of our H3 windows makes installing multi-wide units much easier. It also improves structural integrity and dramatically increases performance with a water-tight mull joint certified up to three-wide and two-high.

EXTERIOR TRIM PROFILES

This exterior trim option comes in four available styles that snap in place on the frame with a clip system. No through-frame anchors or excessive nail holes, leaving you an integrated system that gives homeowners the flexibility to choose the aesthetic they want.

SCULPTED VERSATILITY.

The perfect choice for those who want to have windows open during questionable weather, our Aspen awnings are stunning alone or combined with other window configurations.

Inside you get the same rich wood choices as our Aspen casements. Outside you get your choice of beautiful all-wood or tough aluminum clad exteriors.

All Aspen awning windows come with the same signature hidden locking system for clean interior lines.

HIDDEN LOCKING SYSTEM

The carefully designed architectural lines of Aspen Awnings are ensured by a locking mechanism you can't even see.

HISTORIC CHARM GOES MODERN.

An upgrade to a turn of the century classic, our Westchester is one of our highest performers. It includes a new patent, narrower check-rail sightlines and structural and thermal performance ratings rarely found in the Double Hung market. Historically accurate sash proportions make it ideal for historic renovations or a touch of elegance in new construction.

The fully clad exteriors feature extruded aluminum that's at least twice as thick as roll-form cladding.

Incredible performance ratings achieved.

60"x108" maximum size for 1-3/4" sash.

Patented sill end caps and drainage system.

HIGH VALUE MEETS HIGH PERFORMANCE.

The qualities that make our H3 double hung windows exceptional add up fast. The advanced Fusion Technology™ is the perfect integration of extruded aluminum, vinyl and wood. Its patented design and construction give it an industry-leading seal against the elements.

Add to this a continuous head and sill for water-tight mull joints when putting units together and amazingly easy installation, and you'll understand why it has become a favorite for many.

Irvin Serrano Photography

EASY IS GOOD

Lever-action locks are designed to be easy to operate. Easy-tilt latches make your H3 double hung windows easy to clean.

UNIQUELY CONTEMPORARY AND SMOOTH.

For a more unique style and a more contemporary look than a traditional double hung window, try our Monument horizontal sliding windows, available in two or three-lite configurations.

They're a smart alternative to a two-wide casement when you don't want the sash of a casement or awning window sticking out in the way, on your deck or walkway for example. With the screen removed, they can even serve as a pass-through. But you don't need a practical reason. Many people simply prefer their clean lines and smooth, gliding operation.

BEAUTIFUL LOCKING HARDWARE

Top and bottom locking mechanisms come in a wide variety of luxurious finishes.

FINISHES

SPACE SAVING CONTEMPORARY

When double hung is too traditional and space is limited, Monument Sliders are a smart and exceptionally smooth alternative.

A SLIDER LIKE NO OTHER.

Our H3 easy-glide slider is a welcome addition to our option-rich, easy-tilt H3 double hung, and our H3 casement and awning windows. Depending on design and operational preference, each is an exceptionally smart choice for new construction or window replacement.

As with our other H3 products, these horizontal gliding windows feature the advanced integration of extruded aluminum, vinyl and wood for an industry-leading seal against the elements.

SMOOTH ACTION

Every H3 horizontal slider comes standard with precision steel rollers for exceptionally smooth gliding.

TAKING GLASS TO NEW HEIGHTS, AND WIDTHS.

Reduce window mass, increase the light that fills the room. This is the essence of our direct set thinking.

The heart of many contemporary designs, our direct set windows create stunningly large expanses of glass with the narrowest sightlines and high-performance glass that truly blurs the lines between inside and outside.

If you're looking for a window that almost lets you forget you have windows at all, explore the amazing things you can do with our direct set windows.

H3® direct set also available

CONSIDER DIRECT SET PLUS

This heavy-duty upgrade offers higher energy performance ratings and exceptionally large sizes.

CREATE CONTEMPORARY MASTERPIECES

Many prefer our direct set windows for their narrow sightlines that make them a perfect fit for contemporary designs.

UNIQUE AS YOUR DESIGN.

Every special home deserves a special touch. Sierra Pacific's special geometric shapes, transoms and sidelites offer an individualized dimension to architectural designs.

Add an arched expanse of glass that lights up an entire home, or a large picture window crowned by a half circle. Set transoms above a bank of patio doors, or install a round portal that lets in the moon at midnight.

Used alone or combined with our operating windows and patio doors, our geometric or radius shapes will amplify your design as well as the view, all with uncompromising Sierra Pacific craftsmanship.

Tobin Davies Photography

A SPECIAL TOUCH

Unique window shapes and applications give homes a signature look that truly sets them apart.

TURN A CORNER INTO A CONVERSATION

Stop guests in their tracks with a 90° window configuration that widens the limits of what's possible with artfully framed outdoor views.

Chad Holder Photography for This Old House

ADD DEPTH AND LIGHT TO A ROOM.

Our bay and bow windows add architectural interest to your building's exterior while making interior rooms feel larger, with a multi-pane configuration that draws the outside in. It makes any room more interesting, more personal and more livable.

Common applications are above a kitchen sink or in a dining nook for additional seating. Enjoy both configurations with the richness of all-wood exteriors or the durability of aluminum cladding.

BAY WINDOW (30° AND 45°)

Typically a large fixed window between two casement or double hung units.

30° Angle Bay

LITTLE DETAILS, BIG IMPRESSION.

Anytime you consider our swinging doors, you have lots of choices to consider, like multiple species of interior wood, different hardware and hardware finishes, even glazing and grilles. But no matter what you choose, all our patio doors come with the same attention to detail and innovative engineering you've come to expect from Sierra Pacific.

STANDARD INSWING AND OUTSWING

Single or double, with or without sidelites, our standard swinging doors are the answer to opening your world to the outdoors.

Christopher Mayer Photography

FLEXIBLE ACCESS INSWING AND OUTSWING

A 12" kickrail, flush bolts for inactive panels and multi-point locking hardware, these doors are the perfect counterpart to our Commercial Doors when flexible access is critical.

SHASTA INSWING DOOR

Smart thinking. A two-wide door with one inswing door and one fixed panel paired with a sliding exterior screen.

PERFECT TRANSITION THAT'S SURPRISINGLY SECURE.

Sierra Pacific patio sliding doors create a graceful transition from your indoor to outdoor living areas. While providing the perfect solution for a space-saving opening, these doors feature a multi-point locking system, so they are as secure and durable as they are beautiful. Our gear mechanism is made from corrosion-resistant 300 Series Stainless Steel and our locking system has passed the most stringent forced entry requirements.

MECHANICS MAKE THE DIFFERENCE

Smooth as silk operation is provided by standard tandem stainless steel ball bearing rollers and a fully adjustable design.

BIG IMPRESSIONS WITH A FEATHER TOUCH.

Our bi-fold doors and windows are designed to take contemporary designs to some truly amazing places, turning walls into moving masterpieces. Hinged to fold and glide with the lightest touch, our bi-fold products are available up to 45' wide with as many as eight panels.

They stack out of the way on either side of their expansive openings with an optional access panel to allow passage without moving the entire system. They can swing in or swing out, and can even go around a 90-degree corner or 270-degree inverted corner.

Available in low maintenance exterior clad finishes or luxurious all-wood exteriors, the applications are limitless.

David Lauer Photography

SLIDE YOUR WAY TO UNOBSTRUCTED VIEWS.

Slide them in one direction. Slide them in the other direction. Stack them to one side, or watch them disappear into a pocket in the wall. They'll even go around a 90-degree corner or 270-degree inverted corner.

Our multi-slide doors and windows are engineered to give you years of silky-smooth service as they create unobstructed views and transform your living space.

Find them in a wide range of operational configurations and expansive sizes for limitless applications, ready to perform their impressive vanishing acts.

WIDE AND WIDER

Single direction doors are available up to 5 panels wide while multi-directional door expanses can be a full 10 panels wide.

BUILD IT IN

Use a multi-slide window to effortlessly open a built-in bar to an open dining area.

Keyed flush finger pulls available in Satin Nickel, Oil Rubbed Forever Bronze and Matte Black. Non-keyed flush pulls also available.

DEFY GRAVITY AND SEAL OUT THE WEATHER.

Considered a game changer, our lift & slide door technology features advanced mechanics that raise the door panels to glide effortlessly, then lower them down to seal out the elements.

These remarkable doors are also available in a pocketing configuration, which means expanses of glass up to 45' wide and 10' high can be stowed out of sight, leaving you nothing but open air and spacious living.

With an advanced weep system and certification up to PG50, they're like no other specialty doors made.

SUPERIOR ENGINEERING AND MECHANICS

A high-end roller system lifts the door panel to roll easily, then lowers it to lock in place. The innovative door sill is a drain track that allows any intruding water to drain through the exterior weep gates.

PANELS OF DISTINCTION

When full glass isn't right, panels add a richness and traditional aesthetic that adds warmth and charm. Experiment with our combinations, and find one that opens up a new world of design possibilities.

CHOOSE YOUR STYLE

The combinations of vertical lengths (stiles) and horizontal lengths (rails) give panel doors their unique textured design. Choose from flat panels or raised panels to create a striking accent between two spaces.

YOU COULD GO DUTCH.

Extra ventilation? Easy pass through to the backyard from a kitchen or mudroom? Whatever the reason you're sure to love the utility of a door with a top and bottom panel that operate independently.

Choose an interior shelf and swing screen to add even more utility to an already wonderfully useful creation. It's available in limitless designer options, including 70 exterior finishes with standard bottom panel single-point locking and optional ball bearing hinges.

It's smart to be this functional.

CREATE A SIGNATURE ENTRANCE.

Build bold with the design inspired, modern appearance of our pivot doors. Engineered to float inside their frame on a set of pins mounted in the top and bottom of the door panel, these amazing new doors offer clean lines and a simplicity of form and function that sets them apart from other entrance doors. Add the 90-degree hold/closer pivot option for an effortless pass through.

For a distinctive, custom approach to your next project, Sierra Pacific pivot doors are a great place to start.

IMPACT RESISTANCE THAT FEELS SAFE

If you're building or remodeling in a hurricane area, our FeelSafe windows and patio doors are engineered inside and out to meet some of the highest wind, water and structural performance ratings of any window or door in the United States.

FeelSafe's layered, shatter-resistant laminated glass dramatically reduces the risk of injury while protecting everything inside your home from severe wind and water damage. What's more, FeelSafe glass blocks 99% of UV rays, reduces outside noise up to 50%, improves energy efficiency and even enhances family safety and security by discouraging intruders.

For storm prone coastal areas, the safety and security of our FeelSafe windows and patio doors is invaluable.

VINYL WINDOWS WITH SIERRA PACIFIC DNA.

High quality and high performance don't have to be high priced. Our vinyl windows and patio doors are made right in our Sierra Pacific manufacturing facility, which means they're crafted with many of the same features and design options as our premium wood products.

The latest materials, innovative engineering and advanced technologies are used to enhance their beauty, solid integrity and durability.

You'll find all of our new construction and replacement vinyl products available with a wide range of glazing, exterior color and grille pattern options.

For more information, ask for our Vinyl catalog.

SO MANY WAYS TO MAKE THEM YOURS

Choose from a complete lineup of operating styles, sizes and shapes and a full range of glazing options, from decorative to energy-efficient. They also come in a beautiful range of durable exterior colors with custom colors also available, as well as many grille patterns in simulated divided lite or grilles between the glass.

MAKE SHORT WORK OF BIG TRANSFORMATIONS.

Our Transcend windows and patio doors are perfect sash-only or complete replacements for renovations, remodeling or rebuilding. Most replacement windows come in limited sizes, styles and options. Transcend offers nearly unlimited choices and flexibility, so you can match your existing décor or redo any room with the look you've always wanted.

From transforming an old double hung into a room-brightening patio door to updating a wall of fixed glass, we make replacement easy.

For more information, ask for our Transcend catalog.

TRANSCEND
REPLACEMENT WINDOWS & PATIO DOORS

FOUR WAYS TO TRANSFORM

Choose between easy and affordable sash replacement systems for double hung windows; high-performance H3 Pocket or Insert windows that simply pop right in; our H3 full frame line of replacement windows for more comprehensive projects; and for the ultimate full replacement upgrade, our complete line of made-to-order premium windows and patio doors.

H3 Double Hung

TRANSCEND DOUBLE HUNG SASH REPLACEMENT KIT

THE FUTURE IS WIDE OPEN.

Our innovative Timber Curtain Wall systems are more than a window. They're a building material that offers expansive use of glass, clean straight lines and transparency between indoor and outdoor living.

A significant upgrade over ordinary curtain walls, our glue-laminated wood beams actually eliminate the need for steel beams in some cases.

Photography: Unique Angles

Photography: Unique Angles

The all-wood interiors and tough aluminum clad exteriors add beauty to a system that easily incorporates doors and operable windows.

TESTED IN LABS, PROVEN IN LIFE.

BUILT TO A HIGHER STANDARD

Our timber curtain walls have been tested to ASTM standards for air and water infiltration and wind load performance, plus they meet today's energy standards for heat loss and solar heat gain.
