

SIERRA PACIFIC DOUBLE HUNG SASH KITS

TRANSCEND

REPLACEMENT WINDOWS & PATIO DOORS

**SIERRA
PACIFIC**
WINDOWS THAT
NEVER COMPROMISE

REPLACE YOUR OLD DOUBLE HUNG WINDOWS WITH NEW ENERGY-EFFICIENT SIERRA PACIFIC WINDOWS WITHOUT REMOVING YOUR EXISTING WINDOW FRAME.

If your existing double hung window frames are still in good condition, here's the smartest, least expensive, most convenient way to replace them. Sierra Pacific easy-tilt replacement sash kits are sized to fit your existing sash opening. They install very easily. It's all accomplished from inside your home—without removing your existing frame, sill, interior or exterior trim.

As with every Sierra Pacific product, better engineering in our sash kit means noticeably better performance. Both sash tilt easily to make removal and cleaning a snap. Both sash operate smoothly and seal completely.

So you get all the benefits of today's newest window technology without the expense and mess of a big remodeling project.

HERE'S WHY SIERRA PACIFIC SASH KITS ARE SUPERIOR TO OTHERS:

1. Unlike other sash kits, our balances are concealed. You'll appreciate the difference immediately.
2. Our sash kits are adjustable for far superior installation and smoother operation.
3. Our wood is protected to the very core with CoreGuard™ Plus. It's the best wood protection in the business, and only Sierra Pacific has it.
4. Our sash kits are protected on the outside by double-thick, heavy-duty, .055 extruded aluminum cladding.
5. Our optional integral screen channel is a first.

6. Matching full or half screens are available and automatically Pre-Sized to the Sash Kit.
7. Although you get everything you need (all parts, detailed installation and finishing instructions), we've simplified installation by using fewer parts and no clips.

*Sierra Pacific Sash Replacement Kits fit most conventional makes or brands of wood and clad wood double hungs, but not all. Existing window openings must be square and in good condition, and able to accept Sierra Pacific sash and balance components without modification to them in the field. If you are unsure it is a suitable application to your existing window frames, consult your qualified Sierra Pacific dealer or Sierra Pacific sales professional. You may also visit our website at www.sierrapacificwindows.com for more details.

The exterior of Sierra Pacific sash kits is fully encased in low maintenance, heavy-duty, extruded aluminum. Ours is at least twice as thick as our competitors' roll-form cladding.

What's more, our finishing process leads the industry in durability and environmental safety. Non-hazardous AAMA 2604 and 2605 powder-coatings have the color retention, surface hardness and scratch resistance necessary to withstand even the harshest conditions.

As for colors? Nobody gives you more choices than Sierra Pacific. 75 colors and some sensational textures allow you to add warmth, a splash of cheerfulness or a new statement to your designs. We'll also custom match any color you choose.

Red Oak

Black Walnut

White Oak

Pine (Std)

Copyright Vance Fox, Heslin Construction

A Sierra Pacific replacement sash kit will warm your room with the natural beauty and insulation of wood.

In a perfect world, your windows would match your cabinets perfectly. So Sierra Pacific lets you specify the wood species for your sash kit. While our standard ponderosa pine is pure premium grade, you can also choose from eight other woods or any workable species.

PICK YOUR FAVORITE FINISH.

Lock.

Optional sash lift handle.

CHOOSE FROM 7 OF TODAY'S MOST POPULAR HARDWARE FINISHES.

Espresso

Toffee

A SPOTLESS FACTORY FINISH.

While an unfinished interior is our standard finish, or a Latex Factory Primer is available- both allowing you to apply your own final finish, nothing beats a factory finish performed with state-of-the-art equipment under rigorously controlled, ultra-clean conditions. Sierra Pacific gives you 2 premium options.

Our Ultra Stain brings out all the beauty of your wood interior.

Our Ultra Coat is a catalyzed polyurethane, interior paint that's so durable, it could be used outdoors.

Custom matched stains are also available.

TURN BASIC INTO BOASTFUL.

Enhance your sash kit with the classic charm of our wood grilles or divided lites. Choose from our standard grille configurations, or design your own custom grille.

Removable Wood Grille

Our full surround removable wood grille is a beautiful alternative to divided lites. The grille pops out easily for washing the window or if your tastes change.

Simulated Divided Lites

Get the look of traditional true divided lites, but without the energy loss caused by individual glass panes. Extruded aluminum outside, natural wood inside, and aluminum spacers between the glass. Also available in an all-wood version.

Grilles in Airspace

We seal the grille between the panes of glass. So you get the look you want without the grilles ever getting in your way. Available in solid or two-tone finishes. Choose from flat (5/8") or contour (11/16 or 1") profile.

HIGH PERFORMANCE GLAZING OPTIONS.

What's the best glazing for your replacement windows and patio doors?

Obviously, what's best for a freezing northern winter is not necessarily right for a hot southern summer.

We have the answer. With one of the broadest selections of glazing options in the window industry, Sierra Pacific lets you choose exactly the right performance glass for your exact weather and environmental conditions.

You can choose glazing to improve your energy efficiency and lower your energy bills. You can capture the sun's heat, or reflect it. You can also reduce outside noise, block the sun's damaging UV rays, or even enhance your privacy.

Dual Pane Warm Edge Low-E

Insulated for improved energy efficiency. Single surface low-E coating to reduce solar heat gain and block UV rays.

Low-E 366

Cardinal's triple layer silver product with Warm Edge Spacer, a high density foam, for superior performance. 95% UV protection. Solar heat gain coefficient of 0.27.* Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass.**

Low-E 366 with i89 Coating**

The same superior performance as regular Low-E 366 (above), but with the addition of i89 coating on the interior surface to increase insulating value and reduce solar heat gain. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve protective film or with Preserve and Neat coating.**

Low-E 340 (Southern Climates)

Cardinal's newest glazing innovation. It has an amazingly low 0.18* solar heat gain coefficient to keep out the heat even in the blazing sun. Slightly tinted. Blocks 98% of UV rays. Less heat gain when it's hot, less heat loss when it's cold, and maximum glare control. Also available with Preserve protective film or with Preserve and Neat coating.**

Low-E 180 Passive Solar (Colder Climates)

A very high (0.70*) coefficient for capturing solar heat gain. Ideal for reducing your heating bills in colder climates. Superior insulation value blocks cold and keeps in the heat. Also available with Preserve protective film or with Preserve and Neat coating.**

Low-E 180 Passive Solar with i89 Coating** (Colder Climates)

The same superior performance as regular Low-E 180 (above), but with the addition of i89 coating on the interior surface to increase insulating value. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve protective film or with Preserve and Neat coating for a naturally cleaner glass.**

Insulated Glass

For moderate climates. Basic glazing with basic performance.

Sound Control

Reduces outside noise by as much as 50% while blocking 99% of damaging UV rays. Laminated for shatter resistance. Available insulated or non-insulated.

Additional Options: Obscure Glass

Tempered Glass

Tinted Glass

We offer 11 different decorative glass styles to help you create unique window designs, filter harsh sunlight or enhance privacy and security. From fancy to simple, formal to casual, each has its own personality and lends its own character to your décor. For the optimum in one-of-a-kind, custom designed windows, consider our leaded or stained glass. Your options are limitless. We'll work with you to handcraft anything your mind can imagine.

*All values shown are center of glass. **Interior surface coatings, also known as surface #4, are applied to the interior (room-side surface) of a dual pane IG unit, resulting in improved thermal performance and lower heating costs. Because the coating reflects heat back into the room, the room-side pane of glass will be slightly colder in winter, causing a higher potential for interior condensation. ***Available when selecting XL Edge Spacer.

MEASURING & SIZING INFORMATION.

How To Measure:

1. Measure the width of your existing sash opening from the inside of the wood on the left jamb to the inside of the wood on the right jamb in 3 different places: top, middle, bottom.

2. Measure the sash opening (pocket) height from the head jamb to where the exterior of the bottom sash sits on the sill when fully closed. Measure at the left side, middle, and right side.

Tools Needed:

- Level
- Measuring tape
- Putty knife
- Utility knife
- Flathead screwdriver
- Phillips screwdriver
- Small finishing nails
- Roofing nails
- Hammer
- Miter gauge and protractor
- Saw
- Safety glasses
- Drill and drill bits

3. Measure your sill angle using a miter gauge and protractor, or use another angle measuring tool available at your hardware store. (The standard sill angle for Sierra Pacific sash kits is 14 degrees, but any angle between 5 and 14 degrees is available if specified.)

Custom Sizes in 1/8" Increments Available

Minimum Size:

16.5" x 30.5" sash opening

Maximum Size:

Sash opening widths up to 44", heights up to 92.5"

Sash kits can adjust to fit an opening width by as much as 1/8" via jambliner compression and installation screw adjustment. The sash opening height cannot be adjusted from the actual opening height.

Step **1** Prepare the opening.

Step **2** Install new jamb and balances.

Step **3** Install new sash.

Step **4** Install new head weatherstripping.

Step **5** Enjoy your new window.
